

ENBRIDGE LINE 5

AMERICA'S MOST DANGEROUS PIPELINE

- ⚠ Line 5 is a 645-mile pipeline sending Canadian oil to Canadian refineries via WI and MI, including through the Straits of Mackinac in the Great Lakes
- ⚠ Line 5 is operating in defiance of Tribal treaties and a 2021 shutdown order
- ⚠ Enbridge is already responsible for the largest inland oil spills in MI & MN
- ⚠ Enbridge seeks to replace the original twin pipelines with a new one, to be placed within a tunnel being dug under the Straits of Mackinac
- ⚠ We must STOP THE FAST-TRACKING of permits from the Army Corps of Engineers for this dangerous and costly tunnel project

ENBRIDGE LINE 5

A THREAT TO THE GREAT LAKES

-  The Great Lakes contain 21% of Earth's freshwater, used by 40+ million people
-  23 million gallons/day of petroleum flow through two 72-year-old pipes on the lakebed of the Straits of Mackinac in the Great Lakes
-  The Straits of Mackinac are a busy shipping channel with strong currents between Lake Huron and Lake Michigan
-  The pipes' protective coating is eroding and they have been struck twice in recent years, once by Enbridge itself
-  Since 1968, Line 5 has spilled 33 times for a total of 1.1 million gallons
